

TrailerMaster Drain Valve Installation

Note! The TrailMaster shown above is *de-energised* and in a *closed* position.

1. Connect the "Ignition Active Brown Wire" to the trailer "Brake Wiring".
2. Connect the "Chassis Brown Blue Wire" to the trailer chassis.
3. Connect a constant supply of air pressure to the TrailMaster's "P" Port.

OPERATION: -

The TrailMaster Drain Valve is powered by the trailer's braking system.

The TrailMaster will operate after 30 seconds of applying the trailer brakes.
